

SEEMATZ

Straight-Line Wiper

ATLANTIC Version

SEEMATZ Wiper - ATLANTIC -

Some of our customers ask us to make a combination between our reliable SEEMATZ wiper and a more simple steering. That is the reason why we designed our ATLANTIC type. The ATLANTIC version includes our standard heavy duty SEEMATZ wiper and a steering with the necessary function for easy and safe operation. The respective wiper units remain the same for any of our versions. We do not deliver different wiper for different areas. For SEEMATZ it will be regardless, if you use our product on a river or at sea – on a fishing boat or on a supply vessel. In every case SEEMATZ wipers are design for hard conditions.

Following functions are standard:

1. 3 step interval (5, 10, 15 sec.)
2. 2 continuously speed (ca. 25 m/min. & 40 m/min.)
3. wiper heating control by thermostat
4. status control by LED

Each wiper can be combined with 2 special functions (water/air, CVS. etc.)

Following panel dimensions are available:

- 1 Wiper = 72 x 72 mm
- 2 Wipers = 144 x 72 mm
- 3-4 Wipers = 144 x 144 mm
- 5-9 Wipers = 216 x 144 mm

Scope of delivery:

- Wind screen wiper complete with wiper arm (300 to 1000mm) and wiper blade (300 to 1000mm)
- 3m connecting cable 5pol.
- Power supply unit for 24V, 110V, 230V or other voltage
- Control Panel, Connecting cable/plug D-Sub 25pol. for the connection between Panel and PSU
