

Description

mini Seematz searchlights are made of seawater resistant aluminium. The luminary consists of reflector and frontpane as one unit. Removing two frontpane fastener the complete luminary can be taken out.

The manual steering for operation from the wheelhouse and the handle of the hand-held type are made of aluminium. All steering devices can be built in very easy.

For the types WS and WH the „E“ and „B“ measurement can be changed on customers request.
