

SEEMATZ

Multi-Panel

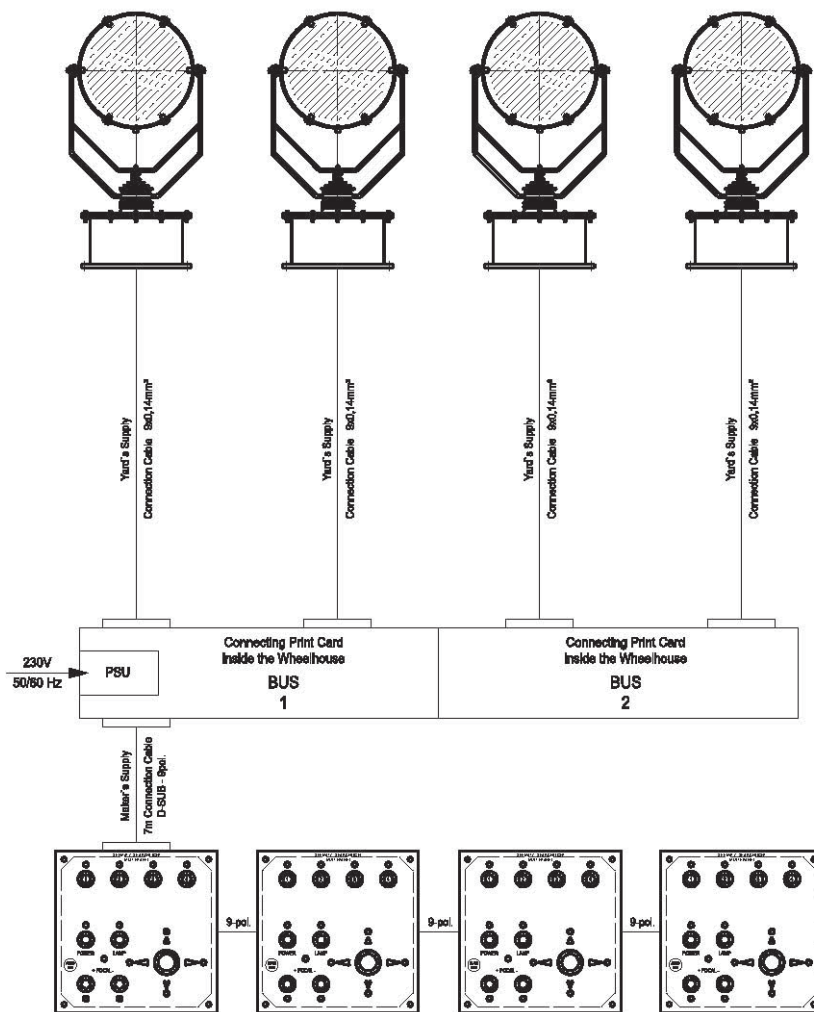

SEEMATZ Multi-Panel

The SEEMATZ Multi-Panel makes it possible to control up to 8 searchlights from up to 8 control panels. Major concerns in design and development are easy installation and safe operation – as usual for SEEMATZ products. Especially on high-performance vessels, which have limited console space, this solution provides a very good possibility to save space without loss of comfort and safety.

Features:

- Control of up to 8 searchlights from one control panel
- Control of several searchlights simultaneously
- Each switch indicated by self dimming LEDs
- Connection from Halogen and/or XENON searchlights possible on the same panel
- Easy installation via standard cables

SEEMATZ Multi-Panel Overview

Max. 8 panels with 8 different searchlights

SEEMATZ searchlights, window wiper, floodlights
